

Recruit an army that you can trust to help advocate on your behalf! America's Frontline Doctors [Citizen Corps](#) can help you connect with like-minded freedom fighters in your area.

In the age of Covid 19, hospitals are no longer safe havens for ethical medical care. Don't wait to connect with like-minded warriors. Build a team that can cover some or all of the roles listed below.

**MPOA/Healthcare Proxy** – The person you have delegated to make medical decisions on your behalf in accordance with your Advance Directive

**Ethical Prescriber and/or Infusion Clinic** – MD/DO/NP/PA etc. A source for ethical treatment supervision, prescription medication and therapies.

**Medical Freedom Attorney/Legal Counsel** - Someone that can help you with the legal aspects of fighting the hospital such as filing emergency injunctions with local courts and communicating with hospital administration.

**At-home Care Team** – RNs/CNAs/EMTs, etc. The hospital should provide you with a list of local home-care resources that your insurance may cover. In some cases a team of volunteers may need to be recruited if insurance refuses to cover the at-home care staff. This team would need to organize and help provide in-home care including medication administration, oxygen therapy, activities of daily living, etc.

**Medical Services Outreach** – Contacting medical service providers that offer outpatient treatment or in-home services as needed, i.e., Palliative Care, Hospice Care Services, Respiratory Therapists, Respiratory Supply Companies, etc.

**Media outreach** – Alerting media outlets of a hospital's refusal to comply with patient's request for safe and ethical treatment against a deadly disease and/or their isolation from loved ones.
